

Porphyry & Skarn. Mapping Core Logging

Ulutaş, Turkey

Aug 31st to 8th Sept 2024

Field Mapping, Core Logging - Training Course

Industry professionals and students are invited to join an 8-day field mapping and core logging course in Ulutaş, Turkey. This is a Tethyan porphyry/skarn system. Participants will learn different styles of mapping including Anaconda and the recommended 'SGM Shotgun'. We will focus on lithological contacts, mineralizing phases, hydrothermal alteration, vein types, structural controls, favorable wall rocks and timing. Core logging will be conducted with graphical quick logs. There will be evening presentations on porphyry systems, with Worldwide examples.

- US\$ 2400 for industry professionals
- US\$ 1500 for accredited students

Costs include transportation from Trabzon on the Black Sea Coast of Northeast Turkey, all meals, accommodation at the Cakir Palace Hotel in Ispir
